June 1, 2021

A message from the Utility General Manager:

In 2020, we continued our commitment to innovation and technology as we maintain and improve our water utility while keeping our customers' needs at the top of our priority list.

Our mission is to provide a reliable, high quality drinking water supply with exceptional customer service and value. We saw our employees live this mission in 2020 through a major world pandemic. Our safe treated drinking water continued to be delivered to our customers 24/7/365. We supplied safe drinking water to all our customers and ensured that water was available at every fire hydrant at required pressure and flowrate.

Examples of Projects completed in 2020:

- Completed replacing all our lead services, both public and private.
- Completed a third round of high velocity flushing of our distribution system.
- Completed a second round of satellite leak detection and proactively repaired sixty-two leaks in our distribution system.
- Obtained Certification for EPA Requirement of Risk and Resilient study and Emergency Response Plan by designated dates for a large water system.
- Completed creating an updated three-year strategic plan.
- Completed the design of our building addition and modifications.
- Replaced over 19,000 feet of water main.
- Completed 2019 annual audit work papers received highest rated opinion on financial statements.
- Finalized rate increase with the PSC for an increase based on financial analysis. Implemented rate case based on PSC authorized rates.
- Researched and assembled COVID eligible cost relating to the CARES grant. Submitted reimbursement requests to the City on a timely basis.
- Implemented e-billing.

We here at the Utility wish to thank the Water Commission, the Mayor, and the members of the Common Council, and all those who contributed to making 2020 a successful year.

Respectfully submitted,

General Manager

Green Bay Water Utility

631 S. Adams St. – P.O. Box 1210 Green Bay, WI 54305-1210 920-448-3480 FAX 920-448-3486 www.gbwater.org

Letter of Transmittal

June 1, 2021

To the Board of Waterworks Commissioners and Utility Customers:

FORMAL TRANSMITTAL OF THE COMPREHENSIVE ANNUAL FINANCIAL REPORT

The Comprehensive Annual Financial Report of the Green Bay Water Utility for the year ended December 31, 2020 is hereby submitted. This report was prepared by the Utility's Business Manager. Responsibility for both the accuracy of the presented data, and the completeness and fairness of the presentation, including all disclosures, rests with the Utility. To the best of my knowledge and belief, the enclosed data is accurate in all material respects and is reported in a manner designed to present fairly the financial position, results of operations, and cash flows of the Utility. disclosures necessary to enable the reader to gain an understanding of the Utility's financial activities have been included. This letter of transmittal is designed to complement the Management's Discussion and Analysis (MD & A) and should be read in conjunction with it. The Green Bay Water Utility's MD & A can be found immediately following the report of the independent auditors.

The Utility is a departmental unit of the City of Green Bay, Wisconsin, and its financial statements are included in the City's financial statements as an enterprise fund referred to as the Water Utility.

PROFILE OF THE WATER UTILITY

The Green Bay Water Utility, along with its predecessor (a privately owned company), has been in business for 134 years. The private commercial venture was begun in 1886 by a syndicate of New Englanders and operated under franchises granted by both of the then-existing Green Bay and Fort Howard communities. A listing of the water rates in force as of October 18, 1887 is included in the statistical section of this report. In 1894, the group of Connecticut promoters who established the

original company sold out to local investors after having operated the system for about eight years. The original private company began operations with three wells, 12 miles of water mains, a pump house with reservoirs and a 12-inch river-crossing main to the west side of the Fox River to supply the community of Fort Howard. When the company sold eight years later to local investors, it had grown to include 29 miles of mains.

Early records were not required, but a 1909 Railroad Commission report lists the locally owned system as having 43.1 miles of main and 4,002 customers, mostly residential. Industrial and commercial users at this early date generally had their own wells.

In 1910, talk began about a municipal owned department, and a referendum overwhelmingly carried, only to have the efforts die there. The price of \$500,000 was rejected by the City Council due to the fact that the amount being considered at that time represented a "staggering" sum. World War I came and went, and the issue resurfaced in 1920. A new referendum was passed, and the system was purchased on November 12, 1920 by the City of Green Bay for \$975,000.

Since inception in 1886, Green Bay had boasted about its pure and abundant water, brought up from deep artesian wells. But growth in population and commercial and industrial activities began to show a strain on the supply. In 1930, the average daily per capita consumption was between 40 and 50 gallons; by 1957, this had mushroomed to nearly 200 gallons.

In addition, the water level, which in 1935 was a mere 95 feet below ground surface, had dropped to 350 feet. The natural reservoir of water could not be replenished as fast as city needs were growing.

By 1952, it was evident that some new source had to be found. Deep, pure, dark blue Lake Michigan was

nearby and an attractive source. After meeting with some opposition, work on the \$10 million facility began in 1956. In August of 1957, construction was completed, and on August 10, 1957, the "new" water streamed and bubbled to customers. In November of 1964, the City of Green Bay annexed the Town of Preble, which had 3,516 customers. By 1970, there were 23,000 customers, and to date, there are approximately 36,000.

The water is still being drawn from Lake Michigan, 27 miles to the east of Green Bay, just north of the City of Kewaunee. The maximum pumping capacity during that first year was approximately 13 million gallons per day (MGD). Today, thanks to system upgrades, the maximum pumping and treatment capacity has grown to approximately 42 MGD.

The Utility's retail service area currently is confined to the City's boundaries. Wholesale service to the Village of Ashwaubenon began in June, 2006, to the Town of Scott in October, 2006, to the Village of Hobart in May, 2011 and to the Village of Wrightstown in June, 2016. Construction and maintenance of all Utility facilities and improvements are the responsibility of the Utility. The Public Service Commission of Wisconsin (PSCW) regulates the Utility's operations pursuant to Chapter 196 of the Wisconsin State Statutes.

INFORMATION USEFUL IN ASSESSING THE WATER UTILITY'S FINANCIAL CONDITION

The Utility's retail service area, which is the City of Green Bay, is the third most populous city in Wisconsin, and has continued to experience substantial growth in population and tax base over the past decades.

The City has become one of the State's predominant manufacturing areas, with particular emphasis on non-durable goods industries. A listing of the 12 largest water consumers is included in the statistical section of this report.

The City has a current estimated population of 105,599. Since 1960, through annexation and consolidation, the City of Green Bay has grown physically from 15.5 square miles to a present area covering approximately 47 square miles. The City's population density of approximately 2,247 persons per square mile indicates there is ample land for future growth and development.

The 2020 City of Green Bay Capital Improvement Program (CIP) initiated the replacement of about 3.73

miles of existing distribution water main infrastructure. The City's Street Resurfacing Program accounted for the 2.03 miles of the water main that was replaced. There was 1.70 miles of water main replacement generated by the City's Street Reconstruction Program. There was .39 miles of new water main footage added into the distribution system in 2020.

In 2020, the Water Treatment Plant completed the addition of a new lab and started the security upgrade project.

In 2020, the Operation's section used Satellite Leak Detection to find 64 leaks which were repaired. The Water Utility had a slight increase in the number of main breaks in 2020 as in 2019. Lead removal was at the top of the list in 2020 for the Metering and Distribution Departments. Virtually all the utility-owned and private lead services were replaced. This completed a five-year project in removing all private and public lead services within the City.

Long-Term Financial Planning

Annually, the Water Utility Commission adopts a non-appropriated operating budget and a five-year capital budget. Both budgets are used as short and long term financial plans in conjunction with the Utility's ten year master plan to anticipate the needs for the current and subsequent years. Monthly analysis of anticipated rate of return and comparison of budget to actual operating income and expense is performed to control costs and avoid potential deficits.

In 2020, our strategic plan was updated from 2016. The updated plan covers 2021-2023.

Policies Impacting Financial Statements

The Water Utility Commission adopted an investment policy in 2004. Accordingly, available cash is invested in certificates of deposit, money market accounts, the State investment pool, commercial paper, U.S. Treasury securities, savings accounts and interest-bearing checking accounts. To reduce risk, the Utility's portfolio is diversified by security type with maximum allowable allocation by instrument and is further restricted by a minimum credit quality rating for each instrument.

Internal Control

In developing and altering the Utility's accounting system, consideration is given to the adequacy of internal accounting controls. Internal accounting controls are designed to provide reasonable, but not absolute, assurance regarding the safeguarding of assets against loss from unauthorized use or disposition and the reliability of financial records for preparing financial statements and maintaining accountability for assets. The concept of reasonable assurance recognizes that the cost of a control should not exceed the benefits likely to be derived and the evaluation of costs and benefits requires estimates and judgments by management. All internal control evaluations occur within the above framework. I believe that the Utility's internal accounting controls adequately safeguard assets and provide reasonable assurance of proper recording of financial transactions.

Independent Audit

The current outstanding bond issues require an annual audit by independent certified public accountants. The Utility has retained Baker Tilly Certified Public Accountants, to perform an audit of the Utility's financial records. The Independent Auditors' Report on Financial Statements is included in the financial section of this report. The unmodified opinion expressed by the auditor on the Utility's financial statements, is an assertion that there have been no significant exceptions as to the accounting principles reflected in the financial statements, the consistency of application of accounting principles, and the adequacy of information disclosures in the financial statements. The Independent Auditors' Report on Internal Control over Financial Reporting, and on Compliance and Other Matters is included in the compliance section of this report.

Management's Discussion and Analysis

The Governmental Accounting Standards Board adopted standards which require a management discussion and analysis to be part of the basic annual audited financial statements. For Management's Discussion and Analysis for the year ended December 31, 2020, please refer to the financial section in this report.

AWARDS AND ACKNOWLEDGEMENTS

Certificate of Achievement

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Utility for its comprehensive annual financial report for the fiscal year ended December 31, 2019. The Certificate of Achievement is a prestigious

national award, recognizing conformance with the highest standards for preparation of state and local government financial reports. In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized comprehensive annual financial report, whose contents conform to program standards. Such comprehensive annual financial reports must satisfy both generally accepted accounting principles and applicable legal requirements. A certificate of Achievement is valid for a period of one year only.

The Utility's Certificate of Achievement for Excellence in Financial Reporting for the year ended December 31, 2019 was the twenty-sixth consecutive GFOA Certificate of Achievement received. We believe our current report continues to conform to the Certificate of Achievement program requirements, and we are submitting it to the GFOA.

Acknowledgements

Preparation of this report on a timely basis could not have been accomplished without the efficient and dedicated services of the entire office staff of the Utility. Appreciation also is extended to all Utility department managers, employees and the Utility's independent auditors who contributed to its contents. Further appreciation is extended to the Water Utility Commissioners for their interest and support in planning and conducting the financial operations of the Utility in a responsible and progressive manner.

Respectfully submitted,

Stephanie R. Rogers

Independent Auditors' Report

To the Board of Commissioners of Green Bay Water Utility Commission

Report on the Financial Statements

We have audited the accompanying financial statements of Green Bay Water Utility, an enterprise fund of the City of Green Bay, Wisconsin, as of and for the year ended December 31, 2020, and the related notes to the financial statements, as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to Green Bay Water Utility's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Green Bay Water Utility's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Green Bay Water Utility as of December 31, 2020, and the respective changes in financial position and cash flows thereof for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Baker Tilly US, LLP, trading as Baker Tilly, is a member of the global network of Baker Tilly International Ltd., the members of which are separate and independent legal entities.

Emphasis of Matters

As discussed in Note 1, the financial statements present only the Green Bay Water Utility enterprise fund and do not purport to, and do not, present fairly the financial position of the City of Green Bay, Wisconsin, as of December 31, 2020 and the respective changes in financial position, or cash flows thereof for the years then ended in accordance with accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

Prior Period Financial Statements

The financial statements of the Green Bay Water Utility, as of and for the year ended December 31, 2019, prior to restatement, were audited by other auditors whose reported dated June 23, 2020, expressed an unmodified opinion.

As part of the audit of the December 31, 2020 financial statements, we also audited the adjustment described in Note 3.B that was applied to restate the 2019 financial statements. In our opinion, such adjustment is appropriate and has been properly applied. We were not engaged to audit, review, or apply any procedures to the 2019 financial statements of the Green Bay Water Utility other than with respect to the adjustment and, accordingly, we do not express an opinion or any other form of assurance on the 2019 financial statements as a whole.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the required supplementary information as listed in the table of contents be presented to supplement the financial statements. Such information, although not a part of the financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the financial statements, and other knowledge we obtained during our audit of the financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental information as listed in the table of contents are presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplemental information is fairly stated in all material respects in relation to the financial statements as a whole.

Other Information

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The introductory section and statistical information as identified in the table of contents is presented for purposes of additional analysis and is not a required part of the financial statements. Such information has not been subjected to the auditing procedures applied in the audit of the financial statements, and accordingly, we express no opinion or provide any assurance on it.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have issued our report dated June 1, 2021 on our consideration of Green Bay Water Utility's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of Green Bay Water Utility's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Green Bay Water Utility's internal control over financial reporting and compliance.

Madison, Wisconsin June 1, 2021

Baker Tilly US, LLP

Management's Discussion and Analysis (Unaudited)
December 31, 2020

As management of the Green Bay Water Utility, we offer readers of the financial statements this narrative overview and analysis of the financial activities for the year ended December 31, 2020.

FUND STRUCTURE

The Water Utility is a business type activity. As such, it records its transactions based on the flow of economic resources.

FINANCIAL OPERATIONS SUMMARY

Total operating and non-operating revenues (including capital contributions) were \$25.89 million in 2020 and expenses were \$19.41 million. The Utility's net position increased by \$6.25 million in 2020 to \$116.4 million. The \$6.9 million of unrestricted net position has been set aside to mitigate against the possibility of future water rate increases. Restricted net position and net position invested in property, plant and equipment were \$8 million and \$101.5 million, respectively.

COMPARISON TO PRIOR FISCAL YEARS

Water sales for 2020 were 5.99 billion gallons compared to 5.95 billion gallons in 2019 and 6.14 billion gallons in 2018. No major customers were added or removed in 2020 or 2019.

Interest income decreased in 2020. The average yield for 2020 was 2.35% compared to 3.19% for 2019 and 2.83% for 2018. The average investment balance increased to \$6.8 million in 2020 from \$6.3 million in 2019. The average investment balance was \$5.9 million in 2018.

Utility operating expenses decreased in 2020 compared to 2019. The Utility added \$7.21 million in capital assets in 2020. Primarily, these capital assets consisted of water distribution mains, services, hydrants, and meters. Utility operating expenses increased slightly in 2019 compared to 2018. The Utility added \$6.97 million in capital assets in 2019. Primarily, these capital assets consisted of water supply and distribution mains, services, hydrants, and meters.

The bond interest expense decreased in 2020 compared to 2019 due to the decrease in interest costs since the 2006 were refinanced during 2019. The increase in bond interest expense in 2019 compared to 2018 was due to the refinancing cost of the refinanced 2006 bonds.

The net position of the Utility increased by \$6.25 million in 2020. Overall, the net position of the Utility increased by \$4.95 million in 2019.

December 31, 2020

CAPITAL ASSETS CHANGES

The Utility's total capital assets increased by \$6.36 million in 2020 and \$4.71 million in 2019. Of the net 2020 increase, \$6.45 million was for new water mains, services, hydrants and meters. Of the 2019 increase, \$5.67 million was for new water mains, services, hydrants and meters. Total capital assets in service before depreciation were \$239.26 million and \$232.90 million as of December 31, 2020 and 2019 respectively. Construction in progress cost was \$292,513 as of December 31, 2020 and \$105,153 as of December 31, 2019. All capital assets were funded by special assessments, developer contributions, Department of Homeland Security grants and Utility funds. Additional information can be found in Note 2 to the basic financial statements.

DEBT ADMINISTRATION

All scheduled bond payments in 2020 and 2019 were made on time. Requirements of the revenue bond ordinances have also been met, in full, as of December 31, 2020 and 2019. In November 2006, the Water Utility issued revenue bonds in the amount of \$49,310,000. The proceeds of this issue were used to refund a portion of the outstanding 2004 revenue bonds. In November 2014, the Water Utility issued revenue bonds in the amount of \$14,055,000. The proceeds of this issue were used to refund the remaining outstanding portion of the 2004 revenue bonds. In October 2017, revenue refunding bonds were issued in the amount of \$15,730,000. The proceeds of this issue were used to refund a portion of the 2006 and 2014 issues. In August 2019, revenue refunding bonds were issued

Management's Discussion and Analysis (Unaudited)
December 31, 2020

in the amount of \$18,705,000 to refund the remaining outstanding portion of the 2006 revenue bonds. The revenue bond debt outstanding was \$40.54 million and \$44.25 million as of December 31, 2020 and 2019 respectively. In 2014, Moody's Investor Service improved the rating of the Utility's revenue bonds from "Aa3" to "Aa2". Additional information can be found in Note 2 to the basic financial statements.

Total	\$44,245,000	\$51,305,000	(\$7,060,000)	-13.8%

INVESTMENT PORTFOLIO

The Utility is required to invest its funds in accordance with Section 66.04(2) of the Wisconsin State Statutes. These statutes authorize numerous types of depository and investment obligations for municipal funds and including those utilized by the Utility. In addition, the Utility has adopted an official investment policy which places additional limits on the amounts that can be invested in any one issuer, the lengths of maturity and the eligible financial institutions based on their credit ratings.

The Utility's cash and investment portfolio totaled \$13.64 million as of December 31, 2020, \$12.69 million as of December 31, 2019 and \$11.88 million as of December 31, 2018. It was earning a weighted average of 2.35% as of December 31, 2020, 3.19% as of December 31, 2019 and 2.83% as of December 31, 2018, based on original purchase price. These utility funds as of December 31, 2020, 2019 and 2018 were invested as follows:

Savings accounts	45.94%	45.25%	42.72%
Total	100.00%	100.00%	100.00%

OTHER FINANCIAL INFORMATION

Annually, the Water Commission adopts a non-appropriated operating budget and a capital budget. Both budgets are used as financial plans in conjunction with the Utility's master plan to anticipate the needs for the current and subsequent years. The Utility's budgets are not formally integrated into the accounting system; however, a monthly analysis of anticipated rate of return and comparison of budget to actual operating income and expense is performed to control costs and avoid potential deficits.

There are no restrictions, commitments, or other limitations that would significantly affect the availability of fund resources for future use except those disclosed related to revenue bond requirements.

Contacting the Water Utility's Financial Management

This financial report is designed to provide Green Bay Water Utility's customers, investors, creditors and other interested parties with a general overview of the Water Utility's finances and to demonstrate the Water Utility's accountability of the money it receives. If you have any questions regarding this report or need additional financial information, please contact the Water Utility's Business Manager.

The notes to the financial statements are an integral part of this statement.

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements of the Green Bay Water Utility, City of Green Bay, Wisconsin (the "Utility"), have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) as applied to government units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The significant accounting principles and policies utilized by the Utility are described below:

A. REPORTING ENTITY

The Utility and the Board of Waterworks Commissioners (the Commission) were created by City of Green Bay (the City) ordinance. The Commission provides nonpartisan management to the Utility pursuant to Chapter 66 of the Wisconsin Statutes. The Commissioners are appointed to seven-year, nonconcurrent terms. The Utility encompasses all water supply and transmission operations within the City. The Utility is a department of the City. In compliance with Governmental Accounting Standards Board (GASB) Statement No. 61, the Utility is presented as an enterprise fund in the City's Comprehensive Annual Financial Report (annual report), which is available from the City's Finance Department at 100 North Jefferson Street, Green Bay, Wisconsin.

B. MEASUREMENT FOCUS AND BASIS OF ACCOUNTING

The Utility accounts for its operations as an enterprise fund. Enterprise funds are used to account for government operations that are financed and operated in a manner similar to private business with the intent that the costs (expenses, including depreciation) of providing services to the general public be financed primarily through user charges.

The Utility financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows.

Enterprise funds distinguish *operating* revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with an Enterprise fund's principal ongoing operations. The principal operating revenues of the Utility are charges to customers for services. Operating expenses include the costs of services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

The Utility is regulated by the Public Service Commission of Wisconsin (PSCW) pursuant to Chapter 196 of the Wisconsin Statutes. The PSCW prescribes accounting policies under a uniform system of accounts for municipal water utilities and approves their rates. These accounting practices are in

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

substantial agreement with generally accepted accounting principles as applicable to governmental enterprise funds except for the recording of additional accumulated depreciation on contributed plant received prior to calendar year 2003, recognition of pension and other post-employment benefits (OPEB) expense, and classification of the tax equivalent on the Statement of Changes in Net Position. These PSCW-prescribed accounting practices are not implemented for reporting purposes in this financial report.

C. ASSETS, LIABILITIES, DEFERRED OUTFLOWS/INFLOWS OF RESOURCES, AND NET POSITION OR FUND BALANCE

1. Cash and Investments

Cash and investments are combined in the financial statements. Cash deposits consist of demand and time deposits with financial institutions and are carried at cost. Investments are stated at fair value. Fair value is the price that would be received to sell an asset in an orderly transaction between market participants at the measurement date. For purposes of the statement of cash flows, all cash deposits and highly liquid investments (including restricted assets) with a maturity of three months or less from date of acquisition are considered to be cash equivalents.

2. Accounts Receivable

Accounts receivable are recorded at gross amounts with uncollectible amounts recognized under the direct write-off method. No allowance for uncollectible accounts has been provided since the Utility has the right under Wisconsin Statute 66.069 to place delinquent water bills on the tax roll for collection.

3. Inventories

Inventories are recorded at cost, which approximates market, using the weighted average method. Inventories consist of expendable supplies held for consumption. The cost is recorded as an expense at the time individual inventory items are consumed rather than when purchased.

4. Prepaid Items

Payments made to vendors that will benefit periods beyond the end of the current fiscal year are recorded as prepaid items and are accounted for on the consumption method.

5. Restricted Assets

Certain proceeds from waterworks revenue bonds and Utility funds set aside for their repayment are classified as restricted on the statement of net position because their use is limited by applicable bond covenants. In addition, certain assets are restricted by external grantors for specific purposes.

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

Restricted assets have also been reported in connection with the net pension asset balance since this balance must be used to fund employee benefits.

6. Capital Assets

Capital assets are defined by the Utility as assets with an initial, individual costs of \$500 or higher and an estimated useful life in excess of a year. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated acquisition value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized.

Estimated lives and depreciation rates are established by the PSCW. The estimated useful lives are as follows:

Assets	Years
Buildings	31-35
Improvements other than buildings	18-77
Machinery and equipment	3-30

7. Sewer and Storm Water Collections

The Utility performs the billing and collection functions for the City of Green Bay Sanitary Sewer Fund and the City of Green Bay Storm Water Utility. After collection, these funds are remitted to the City. The Utility charges the City for these services at cost plus a return on investment.

8. Compensated Absences

It is the Utility's policy to permit employees to accumulate earned but unused vacation and sick leave benefits in accordance with employee handbook policies. All vacation and sick leave is accrued when incurred. A majority of the compensated absences are recorded as a current liability for these amounts are expected to be used within one year.

9. Deferred Outflows/Inflows of Resources

In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense) until then. The Utility has two items that qualify for reporting in this category. The first is the unamortized loss on refunding resulting from the difference in the carrying value of refunded debt and its reacquisition price. This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt. The second item is

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

related to the Utility's proportionate share of the Wisconsin Retirement System pension plan and is deferred and amortized over the expected remaining service lives of the pension plan participants.

In addition to liabilities, the statement of net position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represent an acquisition of net position that applies to a future period and so will not be recognized as an inflow of resources (revenue) until that time. The Utility has one item that qualifies for reporting in this category. The item is related to the Utility's proportionate share of the Wisconsin Retirement System pension plan and is deferred and amortized over the expected remaining service lives of the pension plan participants.

10. Long-term Obligations

Long-term debt and other long-term obligations are reported as Utility liabilities. Bond premiums and discounts are deferred and amortized over the life of the bonds. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are expensed as incurred.

11. Pensions

For purposes of measuring the net pension liability (asset), deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Wisconsin Retirement System (WRS) and additions to/deductions from WRS' fiduciary net position have been determined on the same basis as they are reported by WRS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

12. Net Position

Net Position is classified in three components:

- ▶ Net investment in capital assets. Amount of capital assets, net of accumulated depreciation, and capital related deferred outflows of resources less outstanding balances of any bonds, mortgages, notes, or other borrowings that are attributable to the acquisition, construction, or improvement of those assets and any capital related deferred inflows of resources.
- ▶ **Restricted net position.** Amount of net position that is subject to restrictions that are imposed by 1) external groups, such as creditors, grantors, contributors or laws or regulations of other governments or 2) law through constitutional provisions or enabling legislation.
- ▶ Unrestricted net position. Net position that is neither classified as restricted nor as net investment in capital assets.

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

When both restricted and unrestricted resources are available for use, it is the Utility's policy to use restricted resources first, then unrestricted resources as they are needed

D. USE OF ESTIMATES

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

E. RECLASSIFICATIONS

Certain amounts in the prior year financial statements have been reclassified to conform to the presentation in the current year financial statements with no change in previously reported net position or changes in net position.

NOTE 2: DETAILED NOTES ON ALL FUNDS

A. CASH AND INVESTMENTS

The Utility maintains various restricted and non-restricted cash and investment accounts. Invested cash consists of deposits and investments that are restricted by Wisconsin Statutes to the following:

Time deposits; repurchase agreements; securities issued by federal, state and local governmental entities; statutorily authorized commercial paper and corporate securities; and the Wisconsin local government investment pool.

The carrying amount of the Utility's cash and investments totaled \$13,639,011 on December 31, 2020 and \$12,692,623 on December 31, 2019 as summarized below:

	2020	2019
Petty cash and cash on hand	\$ 1,700	\$ 1,700

Restricted noncurrent assets		
Cash and investments	6,428,697	6,164,543
	\$ 13,639,011	\$12,692,623

Fair Value Measurements

The Utility categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant observable inputs; Level 3 inputs are significant unobservable inputs. The Utility has the following fair value measurements as of December 31, 2020 and December 31, 2019.

- State and local government securities, U.S. Treasuries, corporate bonds and federal agency securities are valued using significant observable inputs (Level 2 inputs) of quoted prices for similar assets in active markets.
- Negotiable certificates of deposit are valued using significant observable inputs (Level 2 inputs) of quoted prices for similar assets in active markets.

Deposits and investments of the Utility are subject to various risks. Presented below is a discussion of the Utility's deposits and investments and the related risks.

Custodial Credit Risk

Custodial credit risk for *deposits* is the risk that, in the event of the failure of a depository financial institution, a government will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. The custodial credit risk for *investments* is the risk that, in the event of the failure of the counterparty (e.g., broker-dealer) to a transaction, a government will not be able to recover the value of its investment or collateral securities that are in the possession of another party. Wisconsin statutes require repurchase agreements to be fully collateralized by bonds or securities issued or guaranteed by the federal government or its instrumentalities. The Utility does not have an additional custodial credit policy.

Deposits with financial institutions within the State of Wisconsin are insured by the Federal Deposit Insurance Corporation (FDIC) in the amount of \$250,000 for the combined amount of all time and savings deposits and \$250,000 for interest-bearing and noninterest-bearing demand deposits per official

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

custodian per insured depository institution. Deposits with financial institutions located outside the State of Wisconsin are insured by the FDIC in the amount of \$250,000 for the combined amount of all deposit accounts per official custodian per depository institution. Deposits with credit unions are insured by the National Credit Union Share Insurance Fund (NCUSIF) in the amount of \$250,000 per credit union member. Also, the State of Wisconsin has a State Guarantee Fund which provides a maximum of \$400,000 per public depository above the amount provided by an agency of the U.S. Government. However, due to the relatively small size of the State Guarantee Fund in relation to the Fund's total coverage, total recovery of insured losses may not be available. This coverage has been considered in determining custodial credit risk.

As of December 31, 2020, \$6,056,321 and as of December 31, 2019, \$4,949,014 of the Utility's deposits with financial institutions were in excess of federal and state depository insurance limits. All amounts were collateralized with securities held by the pledging financial institution or its trust department or agent but not in the Utility's name.

Credit Risk

Generally, credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical rating organization. Wisconsin statutes limit investment in securities to the top two ratings assigned by nationally recognized statistical rating organizations. Presented below is the actual rating as of the yearend for each investment type.

							empt from sclosure Not
Investment Type	Amount	 Aa1	Aa2	 AAA	AA+ to A+	 A to AA-	 Rated

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

Concentration of Credit Risk

The investment policy of the Utility limits the amount that can be invested in any one issuer as presented below. This policy does not apply to investments held in the Debt Reserve Fund which are invested in accordance with terms of the 2019 debt financing transaction.

Investment Type	Limit
U.S. treasury note (per issue)	\$ 5,000,000
U.S. agency (per issue)	\$ 5,000,000
Commercial paper & notes (per issue)	\$ 1,000,000
WI local government investment pool	\$ 10,000,000

Investments in any one issuer (other than U.S. treasury securities, mutual funds and external investment pools) that represent 5% or more of the total Utility investment are as follows:

Issuer	Investment Type	December 31, 2020		Dece	mber 31, 2019
New York Housing	State municipal bond	\$	\$ 1,040,690		1,000,000
Rhode Island Housing	State municipal bond		-		785,000
Vermont Housing	State municipal bond		489,251		460,000
Milwaukee Housing	Local municipal bond		806,867		455,000
Chaska Economic Dev.	Local municipal bond		422,543		395,000
Associated Bank, NA	Certificates of deposits		860,000		890,000

Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates.

One of the ways that the Utility manages its exposure to interest rate risk is by timing cash flows from maturities so that a portion of the portfolio is maturing or coming close to maturity evenly over time as necessary to provide the cash flow and liquidity needed for operations. By laddering its portfolio to match scheduled disbursements and by maintaining a prudent balance in an interest-bearing checking account for unexpected draws, the Utility ensures sufficient liquidity to meet its cash flow needs. The Utility's investment policy requires that the portfolio weighted average maturity shall remain below twelve months. This policy does not apply to investments held in the Debt Reserve Fund which are invested in accordance with terms of the 2019 debt financing transaction. The Utility does not have a formal investment policy relating to specific investment-related risk.

Information about the sensitivity of the fair values of the Utility's investments to market interest rate fluctuations is provided by the following table that shows the distribution of the Utility's investments by maturity:

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

		Remaining Maturity (in Months)

Investments with Fair Values Highly Sensitive to Interest Rate Fluctuations

On December 31, 2020 and 2019, the Utility held no investments that are highly sensitive to interest rate fluctuations (to a greater degree than already indicated in the information provided above).

Investments in Wisconsin Local Government Investment Pool

The Utility has investments in the Wisconsin local government investment pool of \$103,838 and \$103,329 as of December 31, 2020 and 2019 respectively. The Wisconsin local government investment pool (LGIP) is part of the State Investment Fund (SIF), and is managed by the State of Wisconsin Investment Board. The SIF is not registered with the Securities and Exchange Commission, but operates under the statutory authority of Wisconsin Chapter 25. The SIF reports the fair value of its underlying assets annually. Participants in the LGIP have the right to withdraw their funds in total on one day's notice. At December 31, 2020 and 2019 the fair value of the Utility's share of the LGIP's assets was substantially equal to the carrying value. Generally, credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

rating by a nationally recognized statistical rating organization. Wisconsin statutes limit investments in securities to the top two ratings assigned by nationally recognized statistical rating organizations. The Utility does not have an additional credit risk policy. The Utility's investment in the Wisconsin local government investment pool is not rated.

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates. The Utility does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates. The investments held by the Wisconsin local government investment pool mature in 12 months or less.

B. RESTRICTED ASSETS

The restricted assets consist of cash and investments held in the debt reserve and bond redemption funds along with accrued interest as required by revenue bond ordinances and the private service replacement fund as required by the grant agreement and the net pension asset maintained by the Wisconsin Retirement System.

The debt reserve fund requires a balance equal to the minimum reserve amount as defined in the 2019 and 2006 series revenue bond documents. This minimum amount was \$5,592,475 as of December 31, 2020 and 2019. The debt reserve fund account had cash and investments available of \$6,428,697 and \$6,164,544 at December 31, 2020 and 2019 respectively, which were in compliance with the bond ordinance.

The bond redemption fund accumulates monies to be used to make principal and interest payments as they mature. Transfers are made to this fund on a monthly basis. The bond redemption fund balances at December 31, 2020 and 2019 were \$865,000 and \$933,921 respectively. The bond redemption fund was also in compliance with bond ordinances. The excess restricted assets over current liabilities payable from restricted assets is shown as restricted for debt retirement and restricted for private service replacement and restricted for net pension asset in the net position section on the statement of net position.

The private service replacement fund assets are required by a grant to be used for the replacement of lead or galvanized service lines. The excess restricted assets over current liabilities payable from restricted assets is shown as restricted for private service replacement in the net position section on the statement of net position.

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

C. CAPITAL ASSETS

Capital asset activity for the year ended December 31, 2020 was as follows:

Capital assets, not being depreciated: Land			Beginning Balance	Increases	Dec	creases		Ending Balance

Advance Refunding

During 2006, the Water Utility advance refunded a portion of the revenue bond issue from 2004. The Water Utility issued \$49,310,000 of revenue bonds which were used to provide resources to purchase U.S. Government and Local Government Series securities that were placed in an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. As a result, the refunded bonds were considered to be defeased and the liability was removed from the enterprise fund. The outstanding revenue bonds defeased at the time of refunding was \$45,555,000 and has maturities from 2019 through 2029. At December 31, 2020 and 2019, the outstanding balances of the bonds defeased was \$32,515,000 and \$34,960,000, respectively.

During 2017, the Water Utility advance refunded a portion of the revenue bond issue from 2006. The Water Utility issued \$15,730,000 of revenue bonds which were used to provide resources to purchase U.S. Government and Local Government Series securities that were placed in an irrevocable trust for the purpose of generating resources for all future debt service payments of the refunded debt. As a result, the refunded bonds were considered to be defeased and the liability was removed from the enterprise fund. The outstanding revenue bonds defeased at the time of refunding was \$14,530,000 and have maturities from 2020 through 2024. At December 31, 2020 and 2019, the outstanding balances of the bonds defeased was \$11,900,000 and \$14,530,000, respectively.

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

Current Refunding

During 2019, the Utility currently refunded the remainder of the revenue bond issue from 2006. The Utility issued \$18,705,000 of revenue bonds to call the refunded debt. This current refunding was undertaken to reduce total debt service payments over the next ten years by \$2,897,023 and to obtain an economic gain (difference between the present value of the debt service payments of the refunded and refunding bonds) of \$2,387,120.

Revenue Bonds

Revenue bonds outstanding on 2020 and 2019 totaled \$40,540,000 and \$44,245,000 respectfully and were comprised of the following issues:

ate of	Final Maturity	Interest Rates	Original Indebtedness	Balance 12/31/20	Balance 12/31/19
/14/14	11/1/29	2.00 - 3.50%	\$14,055,000	\$ 9,575,000	\$ 10,360,000
/17/17	11/1/24	1.47 - 2.56%	15,730,000	12,260,000	15,180,000
/5/19	11/1/29	4.00 - 5.00%	18,705,000	18,705,000	18,705,000
ligation d	ebt			\$40,540,000	\$44,245,000
	/14/14 /17/17 /5/19	Maturity /14/14 11/1/29 /17/17 11/1/24	Maturity Rates /14/14 11/1/29 2.00 - 3.50% /17/17 11/1/24 1.47 - 2.56% /5/19 11/1/29 4.00 - 5.00%	Assue Maturity Rates Indebtedness 1/14/14 11/1/29 2.00 - 3.50% \$14,055,000 1/17/17 11/1/24 1.47 - 2.56% 15,730,000 1/5/19 11/1/29 4.00 - 5.00% 18,705,000	Assue Maturity Rates Indebtedness 12/31/20 1/14/14 11/1/29 2.00 - 3.50% \$14,055,000 \$ 9,575,000 1/17/17 11/1/24 1.47 - 2.56% 15,730,000 12,260,000 1/5/19 11/1/29 4.00 - 5.00% 18,705,000 18,705,000

Annual principal and interest maturities of the outstanding revenue bonds are detailed below:

Year Ended			
December 31,	Principal	Interest	Total
2021	\$ 3,775,000	\$ 1,420,186	\$ 5,195,186
2022	3,855,000	1,336,933	5,191,933
2023	3,945,000	1,246,088	5,191,088
2024	4,045,000	1,146,927	5,191,927
2025	3,530,000	1,039,525	4,569,525
2026 - 2029	21,390,000	2,512,100	23,902,100
	\$ 40,540,000	\$ 8,701,759	\$ 49,241,759

All Utility revenues net of specified operating expenses are pledged as security of the above revenue bonds until the bonds are defeased. Principal and interest paid for 2020 and 2019 were \$5,391,707 and \$5,139,210, respectively. Total customer net revenues as defined for the same periods were \$14,376,788 and \$12,979,442. Annual principal and interest payments are expected to require 38% of net revenues on average.

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

E. PENSION PLAN

1. Plan Description

The WRS is a cost-sharing, multiple-employer, defined benefit pension plan. WRS benefits and other plan provisions are established by Chapter 40 of the Wisconsin Statutes. Benefit terms may only be modified by the legislature. The retirement system is administered by the Wisconsin Department of Employee Trust Funds (ETF). The system provides coverage to all eligible State of Wisconsin, local government and other public employees. All employees, initially employed by a participating WRS employer on or after July 1, 2011, and expected to work at least 1200 hours a year and expected to be employed for at least one year from employee's date of hire are eligible to participate in the WRS.

ETF issues a standalone Comprehensive Annual Financial Report (annual report), which can be found at http://etf.wi.gov/publications/cafr.htm.

For employees beginning participation on or after January 1, 1990, and no longer actively employed on or after April 24, 1998, creditable service in each of five years is required for eligibility for a retirement annuity. Participants employed prior to 1990 and on or after April 24, 1998, and prior to July 1, 2011, are immediately vested. Participants who initially became WRS eligible on or after July 1, 2011, must have five years of creditable service to be vested. Employees who retire at or after age 65 (54 for protective occupation employees, 62 for elected officials and State executive participants) are entitled to receive an unreduced retirement benefit. The factors influencing the benefit are 1) final average earnings, 2) years of creditable service, and 3) a formula factor.

Final average earnings are the average of the participant's three highest years' earnings. Creditable service is the creditable current and prior service expressed in years or decimal equivalents of partial years for which a participant receives earnings and makes contributions as required. The formula factor is a standard percentage based on employment category.

Employees may retire at age 55 (50 for protective occupation employees) and receive reduced benefits. Employees terminating covered employment before becoming eligible for a retirement benefit may withdraw their contributions and forfeit all rights to any subsequent benefits.

The WRS also provides death and disability benefits for employees.

2. Post-Retirement Adjustments

The Employee Trust Funds Board may periodically adjust annuity payments from the retirement system based on annual investment performance in accordance with s. 40.27, Wis. Stat. An increase (or decrease) in annuity payments may result when investment gains (losses), together with other

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

actuarial experience factors, create a surplus (shortfall) in the reserves, as determined by the system's consulting actuary. Annuity increases are not based on cost of living or other similar factors. For Core annuities, decreases may be applied only to previously granted increases. By law, Core annuities cannot be reduced to an amount below the original, guaranteed amount (the "floor") set at retirement. The Core and Variable annuity adjustments granted during recent years are as follows:

Year	Core Fund Adjustment	Variable Fund Adjustment
2010	(1.30)%	22.0%
2011	(1.20)	11.00
2012	(7.00)	(7.00)
2013	(9.60)	9.00
2014	4.70	25.00
2015	2.90	2.00
2016	0.50	(5.00)
2017	2.00	4.00
2018	2.40	17.00
2019	0.00	(10.00)

3. Contributions

Required contributions are determined by an annual actuarial valuation in accordance with Chapter 40 of the Wisconsin Statutes. The employee required contribution is one-half of the actuarially determined contribution rate for general category employees and Executives and Elected Officials. Starting on January 1, 2016, the Executives and Elected Officials category was merged into the General Employee Category. Required contributions for protective employees are the same rate as general employees. Employers are required to contribute the remainder of the actuarially determined contribution rate. The employer may not pay the employee required contribution unless provided for by an existing collective bargaining agreement.

WRS recognized \$301,952 and \$277,410 in contributions from the Utility for the current and prior reporting periods, respectively.

Contribution rates for the reporting period are:

	20	20	2019		
Employee Category	Employee	Employer	Employee	Employer	
General (including teachers,	6.55%	6.55%	6.70%	6.70%	
executives & elected officials					
Protective with Social Security	6.55%	10.55%	6.70%	10.70%	
Protective without Social Security	6.55%	14.95%	6.70%	14.90%	

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

4. Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

At December 31, 2020, the Utility reported a liability (asset) of (\$858,420) for its proportionate share of the net pension asset. The net pension asset was measured as of December 31, 2019, and the total pension asset used to calculate the net pension asset was determined by an actuarial valuation as of December 31, 2018 rolled forward to December 31, 2019. No material changes in assumptions or benefit terms occurred between the actuarial valuation date and the measurement date. The Utility's proportion of the net pension asset was based on the Utility's share of contributions to the pension plan relative to the contributions of all participating employers. At December 31, 2019, the Utility's proportion was .0263581%, which was an increase of .0003338% from its proportion measured as of December 31, 2018.

At December 31, 2019, the Utility reported a liability (asset) of \$910,735 for its proportionate share of the net pension liability. The net pension liability was measured as of December 31, 2018, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of December 31, 2017 rolled forward to December 31, 2018. No material changes in assumptions or benefit terms occurred between the actuarial valuation date and the measurement date. The Utility's proportion of the net pension liability was based on the Utility's share of contributions to the pension plan relative to the contributions of all participating employers. At December 31, 2018, the Utility's proportion was .0260243%, which was an decrease of .0215829% from its proportion measured as of December 31, 2017.

For the year ended December 31, 2020 and 2019, the Utility recognized pension expense of \$35,249 and \$613,626, respectively.

At December 31, 2020, the Utility reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows		Det	Deferred Inflows	
	of	Resources	0	f Resources	
Differences between expected and actual experience	\$	1,616,335	\$	792,213	
Net differences between projected and actual					
earnings on pension plan investments		-		1,779,560	
Changes in assumptions		64,050		-	
Changes in proportion and differences between					
employer contributions and proportionate share					
of contributions		59		6,803	
Employer contributions subsequent to the					
measurement date		301,952			
Total	\$	1,982,396	\$	2,578,576	

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

At December 31, 2019, the Utility reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	 rred Outflows Resources	 erred Inflows Resources
Differences between expected and actual experience	\$ 709,323	\$ 1,253,831
Net differences between projected and actual		
earnings on pension plan investments	1,330,066	-
Changes in assumptions	153,517	-
Changes in proportion and differences between employer contributions and proportionate share		
of contributions	839	9,100
Employer contributions subsequent to the		
measurement date	277,410	
Total	\$ 2,471,155	\$ 1,262,931

The \$301,952 reported as deferred outflows related to pension resulting from the Utility's contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended December 31, 2021. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pension will be recognized in pension expense as follows:

Year ended		Net Deferred Outflow		
December 31,	_ <u>of</u>	Resources		
2021	\$	(268,246)		
2022		(198,923)		
2023		29,481		
2024		(460,444)		
Total	\$	(898, 132)		

5. Actuarial Assumptions

The total pension liability in the December 31, 2018, actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

	2020	2019
Actuarial valuation date:	December 31, 2018	December 31, 2017
Measurement date of net pension liability (asset):	December 31, 2019	December 31, 2018
Actuarial cost method:	Entry Age Normal	Entry Age Normal
Asset valuation method:	Fair Value	Fair Value
Long-term expected rate of return:	7.0%	7.0%
Discount rate:	7.0%	7.0%
Salary increases:		
Inflation	3.0%	3.0%
Seniority/Merit	0.1% - 5.6%	0.1% - 5.6%
Mortality	Wisconsin 2018 Mortality Table	Wisconsin 2018 Mortality Table
Post-retirement adjustments*	1.9%	1.9%

No post-retirement adjustment is guaranteed. Actual adjustments are based on recognized investment return, actuarial experience and other factors. 1.9% is the assumed annual adjustment based on the investment return assumption and the post-retirement discount rate.

Actuarial assumptions are based upon an experience study conducted in 2018 that covered a three-year period from January 1, 2015 to December 31, 2017. The total pension liability for December 31, 2019 is based upon a roll-forward of the liability calculated from the December 31, 2018 actuarial valuation. The total pension liability for December 31, 2018 is based upon a roll-forward of the liability calculated from the December 31, 2017 actuarial valuation.

Long-term Expected Return on Plan Assets. The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major asset class as of December 31, 2020 are summarized in the following table:

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

	Current Asset Allocation %	Long-term Expected Nominal Rate of Return %	Long-term Expected Real Rate of Return %
Core Fund Asset Class			
Global equities	49%	8.0%	5.1%
Fixed income	24.5%	4.9%	2.1%
Inflation sensitive assets	15.5%	4.0%	1.2%

Total Variable Fund	100%	8.0%	5.4%

New England Pension Consultants Long Term US CPI (Inflation) Forecast: 2.5%

Asset Allocations are managed within established ranges, target percentages may differ from actual monthly allocations

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

Single Discount Rate. A single discount rate of 7.00 percent was used to measure the total pension liability as of December 31, 2020 and December 31, 2019. This single discount rate was based on the expected rate of return on pension plan investments of 7.00 percent and a long term bond rate of 2.75 percent and 3.71 percent, in 2020 and 2019 respectively. (Source: Fixed-income municipal bonds with 20 years to maturity that include only federally tax-exempt municipal bonds as reported in Fedelity Index's "20-year Municipal GO AA Index" as of December 31, 2019. In describing this index, Fidelity notes that the Municipal Curves are constructed using option-adjusted analytics of a diverse population of over 10,000 tax-exempt securities.) Because of the unique structure of WRS, the 7.00 percent expected rate of return implies that a dividend of approximately 1.9 percent will always be paid. For purposes of the single discount rate, it was assumed that the dividend would always be paid. The projection of cash flows used to determine this single discount rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments (including expected dividends) of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the Utility's proportionate share of the net pension liability to changes in the discount rate. The following presents the Utility's proportionate share of the net pension liability calculated using the discount rate of 7.00%, as well as what the Utility's proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (6.00 percent) or 1-percentage-point higher (8.00 percent) than the current rate.

The sensitivity analysis as of December 31, 2020 follows:

	1%	Decrease to		Current	1%	Increase to
	Dis	scount Rate (6.00%)	Dis	count Rate (7.00%)	Di	scount Rate (8.00%)
Utility's proportionate share of						_
the net pension liability (asset)	\$	2,188,657	\$	(858,420)	\$	(3,121,580)

The sensitivity analysis as of December 31, 2019 follows:

	 Decrease to scount Rate (6.00%)	Dis	Current count Rate (7.00%)	-	Increase to scount Rate (8.00%)
Utility's proportionate share of					
the net pension liability (asset)	\$ 3,619,355	\$	910,735	\$	(1,103,335)

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

Pension plan fiduciary net position. Detailed information about the pension plan's fiduciary net position is available in separately issued financial statements available at http://etf.wi.gov/publications/cafr.htm.

6. Payables to the Pension Plan

At December 31, 2020 and 2019, the Utility reported no outstanding amount of contributions to the pension plan.

F. OTHER POSTEMPLOYMENT BENEFITS

Plan Description: The Utility provides health care insurance coverage for employees who retire until they reach the age of 65, under a plan administered by the City of Green Bay. The retired employee contributes 100% of the premium for family coverage or 100% of the premium for single coverage. The City of Green Bay obtained an actuarial valuation report dated January 1, 2019 in accordance with the parameters of GASB Statement No. 75 which resulted in an immaterial liability. As such, no liability is applicable to the utility.

NOTE 3: OTHER INFORMATION

A. RISK MANAGEMENT

The Utility is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets; errors and omissions; and natural disasters for which the government carries commercial insurance. The Utility along with the City completes an annual review of its insurance coverage to ensure adequate coverage.

Liability Self-Insurance Fund

During 1987, the City of Green Bay, along with the Utility as a department of the City, together with certain other units of government within the State of Wisconsin, created the Cities and Villages Mutual Insurance Company (CVMIC) to provide liability insurance services to its members under section 611.23 of the Wisconsin Statutes. The Utility, along with the City, is partially self-insured for liability insurance and pays premiums to CVMIC for its excess liability insurance coverage. The actuary for CVMIC determines premium charges to its members who are required to pay the expected claims and loss adjustment expenses. CVMIC's ongoing operational expenses, other than loss adjustment expenses, are apportioned pro rata to each member. CVMIC provides general liability, public entity liability and vehicle liability coverage for the Utility and the City up to \$2,000,000. The Utility's self-insured retention limit is \$225,000 for any one occurrence, \$1,000,000 aggregate.

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

The City and Utility also carry excess insurance, which covers up to \$15,000,000. Premiums paid by the Utility to CVMIC are expensed over the term of the policy coverage period. A separate financial report is issued annually by CVMIC. Claims liabilities of \$908,900 at December 31, 2020 and \$1,025,400 at December 31, 2019 were reported in the City of Green Bay's liability self-insurance internal service fund based on the requirements of GASB Statement No. 10, which requires that a liability for claims be reported if information prior to the issuance of the financial statements indicates that it is probable that a liability has been incurred at the date of the financial statements and the amount of the loss can be reasonably estimated. Changes in the City's internal service fund's claim liability amount for 2020 and 2019 follow:

		Current Year		
		Claims and		
	Liability	Changes in	Claims	Liability
	January 1	Estimates	Payments	December 31
2020	\$ 1,025,400	\$ 185,774	\$ 302,274	\$ 908,900
2019	1,134,533	118,652	227,785	1,025,400

Health and Dental Self-Insurance Fund

Utility and City full-time employees, retirees and employee dependents are eligible for medical and dental benefits from a health and dental self-insurance fund. Funding is provided by charges to the Utility, the City, employees and retirees. Retirees are billed monthly for premiums for health and dental benefits based on actual costs for providing such benefits. Through December 31, 2012, retirees were allowed to pay the same premium as active employees. Effective January 1, 2013, a ten year plan was approved by the City Common council, whereby retirees' premiums will increase with medical inflation plus an average of 6.6% annually and accumulating over the ten year period to more accurately match their rates with costs incurred by the retiree group. The program is supplemented by stop loss protection, which limits the Utility's and City's annual liability. The 2020 and 2019 stop loss limits are \$300,000 and \$275,000, respectively, per specific claim plus an additional risk corridor of \$65,000. Fund expenses consist of payments to third-party consultant and administrators, medical and dental claims, and stop loss insurance premiums. The City of Green Bay's health and dental self-insurance internal service fund had established equity reserves for future unreported claims of \$1,962,309 on December 31, 2020 and \$1,556,210 on December 31, 2019. Claims liabilities of \$341,561 at December 31, 2020 and \$554,243 at December 31, 2019 were reported in the City of Green Bay's health and dental selfinsurance internal service fund based on the requirements of GASB Statement No. 10, which requires that a liability for claims be reported if information prior to the issuance of the financial statements

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

indicates that it is probable that a liability has been incurred at the date of the financial statements and the amount of the loss can be reasonably estimated.

Changes in the City's health and dental internal service fund's claim liability amount for 2020 and 2019 follow:

			Current Year			
			Claims and			
		Liability	Changes in	Claims		Liability
	J	anuary 1	Estimates	Payments	Dec	cember 31
2020	\$	554,243	\$ 13,606,313	\$ 13,818,995	\$	341,561
2019		534,697	14,640,621	14,621,075		554,243

Workers' Compensation Self-Insurance Fund

The Utility, along with the City, have established a workers' compensation fund to finance workers' compensation awards for their employees. The program is funded by charges to the Utility and the City. The program is also supplemented by stop loss protection, which limits the Utility's and City's annual liability to \$750,000 per incident, per occurrence for protective service employees \$750,000 per incident, per occurrence for all other employees. Fund expenses and the accrual of claim liabilities are accounted for in the same manner as discussed previously for the liability and health and dental self-insurance funds. Claims liabilities of \$2,045,753 at December 31, 2020 and \$1,641,646 at December 31, 2019 were reported in the City of Green Bay's workers' compensation self-insurance internal service fund based on the requirements of GASB Statement No. 10, which requires that a liability for claims be reported if information prior to the issuance of the financial statements indicates that it is probable that a liability has been incurred at the date of the financial statements and the amount of the loss can be reasonably estimated. Changes in the City's workers' compensation internal service fund's claim liability amount for 2020 and 2019 follow:

		Current Year		
		Claims and		
	Liability	Changes in	Claims	Liability
	January 1	Estimates	Payments	December 31
2020	\$ 1,641,646	\$ 1,099,482	\$ 695,375	\$ 2,045,753
2019	1,251,348	1,367,209	976,911	1,641,646

B. PRIOR PERIOD ADJUSTMENT

During the year, the Utility corrected the accounting treatment for the tax equivalent to include it as a current liability and a corresponding transfer out in the correct year. Prior to such correction, the utility recorded no liability and recorded the tax equivalent as an operating expense on a one-year delay. This correction required an adjustment of the prior period and a restatement of net position in 2019. The affected balances within the financial statements for the period ended December 31, 2019 are as follows:

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

	20	019 (restated)	_ (as pre	2019 viously reported)
Current Liabilities Accrued taxes	\$	2,477,790	\$	- -
Operating Expenses Taxes	\$	-	\$	2,394,972
Transfers Transfers out - tax equivalent	\$	2,477,790	\$	- -
Net Position Beginning net position Ending net position		105,250,928 110,118,491		107,645,900 112,596,281

C. UPCOMING ACCOUNTING PROUNOUNCEMENTS

The Governmental Accounting Standards Board (GASB) has approved the following:

Statement No. 87, Leases

Statement No. 89, Accounting for Interest Cost Incurred before the End of a Construction Period

Statement No. 91, Conduit Debt Obligations

Statement No. 92, Omnibus 2020

Statement No. 93, Replacement of Interbank Offered Rates

Statement No. 94, *Public-Private and Public-Public Partnerships and Availability Payment Arrangements*

Statement No. 96, Subscription-Based Information Technology Arrangements

Statement No. 97, Certain Component Unit Criteria, and Accounting and Financial Reporting for Internal Revenue Code Section 457 Deferred Compensation Plans - an amendment of GASB Statements No. 14 and No. 84, and a supersession of GASB Statement No. 32

When they become effective, application of these standards may restate portions of these financial statements.

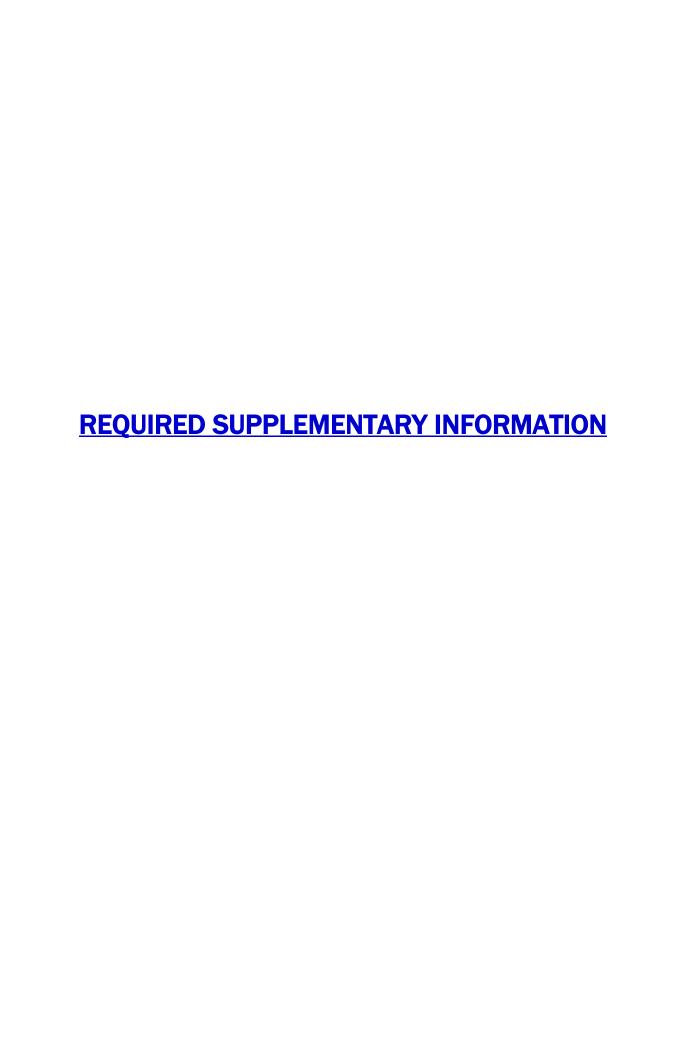

NOTES TO BASIC FINANCIAL STATEMENTS DECEMBER 31, 2020 AND 2019

SUBSEQUENT EVENT

The Utility evaluated subsequent events through June 1, 2021 the date that the financial statements were available to be issued, for events requiring recording or disclosure in the financial statements.

Debt Issue

On March 23, 2021, the Utility issued \$7,080,000 of water system revenue bonds. The debt matures on November 1, 2040 and bears an interest rate of 2.00 - 3.00%.

NOTES TO REQUIRED SUPPLEMENTARY INFORMATION

Changes in benefit terms. There were no changes of benefit terms for any participating employer in the Wisconsin Retirement System.

Changes in Assumptions . Actuarial assumptions are based upon an experience study conducted in 2018 using experience from 2015 – 2017. Based on the experience study conducted in 2018, actuarial assumptions used to develop Total Pension Liability changed, including the discount rate, long-term expected rate of return, post-retirement adjustment, wage inflation rate, mortality and separation rates.

The amounts reported for each fiscal year were determined as of the calendar year-end that occurred within the prior fiscal year. The Utility is required to present the last ten fiscal years of data; however accounting standards allow the presentation of as many years as are available until ten fiscal years are presented.

Note: Total special assessments billed consists mainly of special assessments installments placed on the City's tax roll.

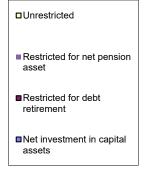

The City reimburses the Water Utility within 30 days of being invoiced by the Utility and then records the assessments on the City's financial statements as a receivable.

^{(1) -} The property tax equivalent remains an operating expense for rate setting purposes of the PSCW.

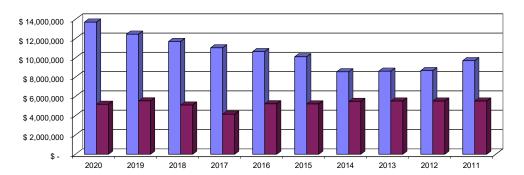

^{(2) -} The PSCW has modified the calculation of the rate of return effective January 1, 2004 by reclassifying the pre-2003 contributions in aid of construction and additional accumulated depreciation as a regulatory liability. The PSCW has also modified the calculation of the rate of return effective January 1, 2015 by reclassifying a portion of the effects of the implementation of GASB 68 on the current year pension expense as a regulatory liability.

WATER UTILITY CITY OF GREEN BAY, WISCONSIN

WATER RATES IN EFFECT ON OCTOBER 18, 1887

Bakeries

Bakeries may be charged according to the average daily use of flour, namely, for each barrel per day, the sum of \$4.00 annually; provided that in no case will the bakery be charged less than \$8.00 per year.

Manufacturing and other purposes

In all cases when large quantities of water are required, the quantity is to be ascertained by meters. For the first 2,000 gallons used daily, the rate is 4¢ per 100 gallons. For the quantity in excess of 2,000 gallons and up to 5,000 gallons used daily, the rate is 3¢ per 100 gallons. For the quantity in excess of 5,000 gallons up to 10,000 gallons used daily, the rate is 2¢ per 100 gallons.

Private Stables with one faucet therein

For first horse	\$4.00 per year
Each additional horse	\$2.50 per year
Each cow	\$1.50 per year

Livery Club and Boarding Stables with one faucet therein

For six horses or less	\$12.00 per year
For each additional horse	\$1.50 per year

Steam Engines

Stationary steam engines working not over twelve hours per day may be charged by the horse-power as follows; for each horse-power up to and not exceeding ten, the sum of \$4.00 per year. For each horse-power exceeding ten and not over fifteen, the sum of \$3.50 per year. For each horse-power over fifteen, the sum of \$3.00 per year. No steam engine will be charged less than \$10.00 per year.

Eating House

Refectories, confectioners, eating houses, fish stalls, provision shops, refreshment and oyster houses will be charged not more than \$50.00 per year.

Stores, offices, etc.

For each tenement occupied as a store, warehouse, or office	\$6.00 per year
Barber shop, first chair	\$6.00 per year
Barber shop, each additional chair	\$2.00 per year

Dwelling Houses

Dwelling houses up to five rooms, for the first faucet	\$5.00 per year
For each additional room	\$1.00 per year
For each additional faucet	\$2.00 per year

COMPLIANCE SECTION

Independent Auditors' Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance With Government Auditing Standards

To the Board of Commissioners of Green Bay Water Utility Commission

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of Green Bay Water Utility (the Utility), an enterprise fund of the City of Green Bay, Wisconsin as of and for the year ended December 31, 2020, and the related notes to the financial statements, and have issued our report thereon dated June 1, 2021. Our report contained an emphasis of matter paragraph. Our opinion is not modified with respect to this matter.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Utility's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Utility's internal control. Accordingly, we do not express an opinion on the effectiveness of the Utility's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and, therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as discussed below, we identified certain deficiencies in internal control that we consider to be material weaknesses.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal controls such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. We consider the deficiency described below to be a material weakness.

2020 - 01 Internal Control Over Financial Reporting

Criteria

AU-C Section 265, Communicating Internal Control Related Matters Identified in an Audit, requires auditors to report a weakness if there is a deficiency in internal controls that would not prevent, or detect and correct, a material misstatement on a timely manner.

Baker Tilly US, LLP, trading as Baker Tilly, is a member of the global network of Baker Tilly International Ltd., the members of which are separate and independent legal entities.

2020 - 01 Internal Control Over Financial Reporting (cont.)

Condition

Management had previously accounted for the tax equivalent payment on a cash basis. As such, no liability has been reported for tax equivalent payments made in the subsequent calendar years. The utility is required to follow the full accrual basis of accounting as required by Generally Accepted Accounting Principles (GAAP).

Cause

Management has historically applied the aforementioned accounting treatment without exception made from the previous auditor(s).

Effect

The 2019 financial statements were required to be restated to correctly record the liability, expense and impact on net position in the proper period.

Recommendation

We recommend management establish a process for the review of accounting policies to ensure they are in conformance with GAAP.

Management Response

The Utility followed consistent practice from year to year in recording the tax equivalent payment to the City. The Utility will follow the full accrual basis of accounting as required by Generally Accepted Accounting Principles (GAAP).

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Utility's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of This Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Utility's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Madison, Wisconsin June 1, 2021
